IMPELLER SYSTEM

- Integration through a special DN 150 or DN 225 screw cap
- Can be used for all 1,000 and 1,250 litre SCHÜTZ ECOBULK containers
- Pre-installed in the filling opening of the inner bottle
- Can be combined with an additional dip-tube system
- All external parts made completely of HDPE

MX 1250

MX 1000

SX-EX 1000

HX 1000

MIXER ATTACHMENT

- Simple attachment of a drive through a form-fit connection with the screw cap
- An adapter frame provides the necessary stability during the stirring process

APPROVALS

- UN 31HA1/Y
- Checked for electrostatic safety
- Suitable for use in ex-zones 1+2

NEW!

Mix and stir –
with cleanliness and efficiency.

The IMPELLER System eliminates the need for complex external stirring systems:

- Closed loop system
- Enhanced safety and cleanliness through a brand-new stirrer in each IBC
- Minimises the risk of filling good contamination
- No contamination hazard caused by residues on the stirrer through the elimination of multiple use
- Uncomplicated, fast handling thanks to an easy-to-attach drive

Please do not hesitate to contact us regarding any technical concerns or questions. The SCHÜTZ IMPELLER System is currently under development.
